- 1 biologist, 2 physicist, 2 computer science researcher and 9 mathematician

Survey after the training: 13 staff member

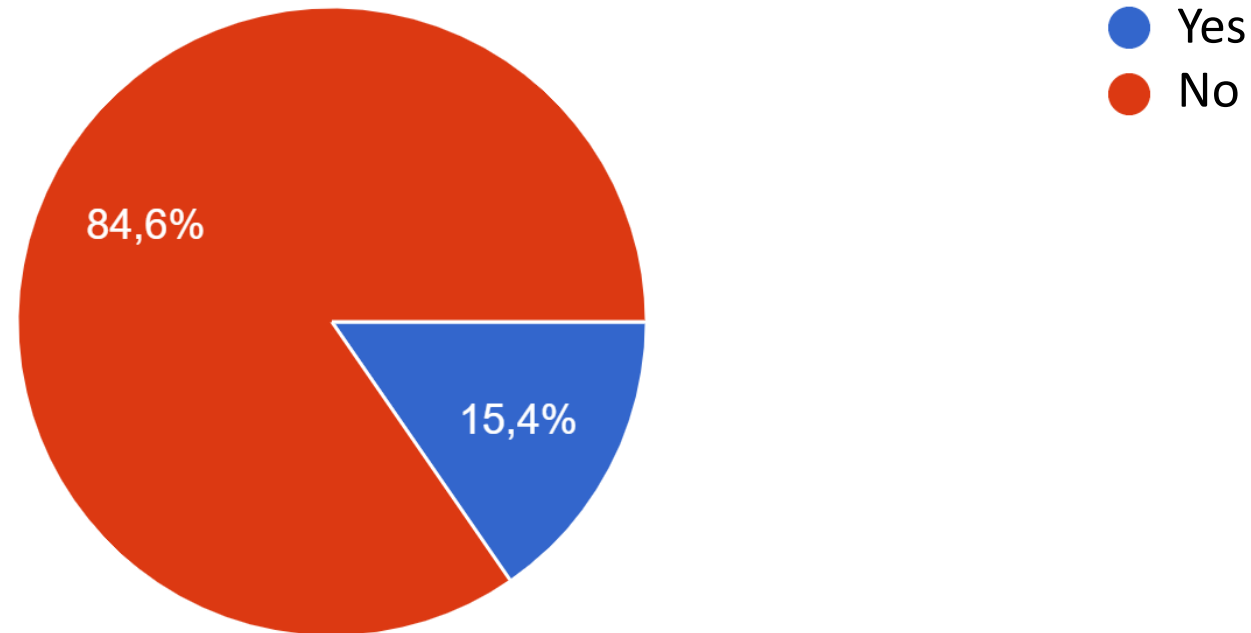

Years of teaching experience

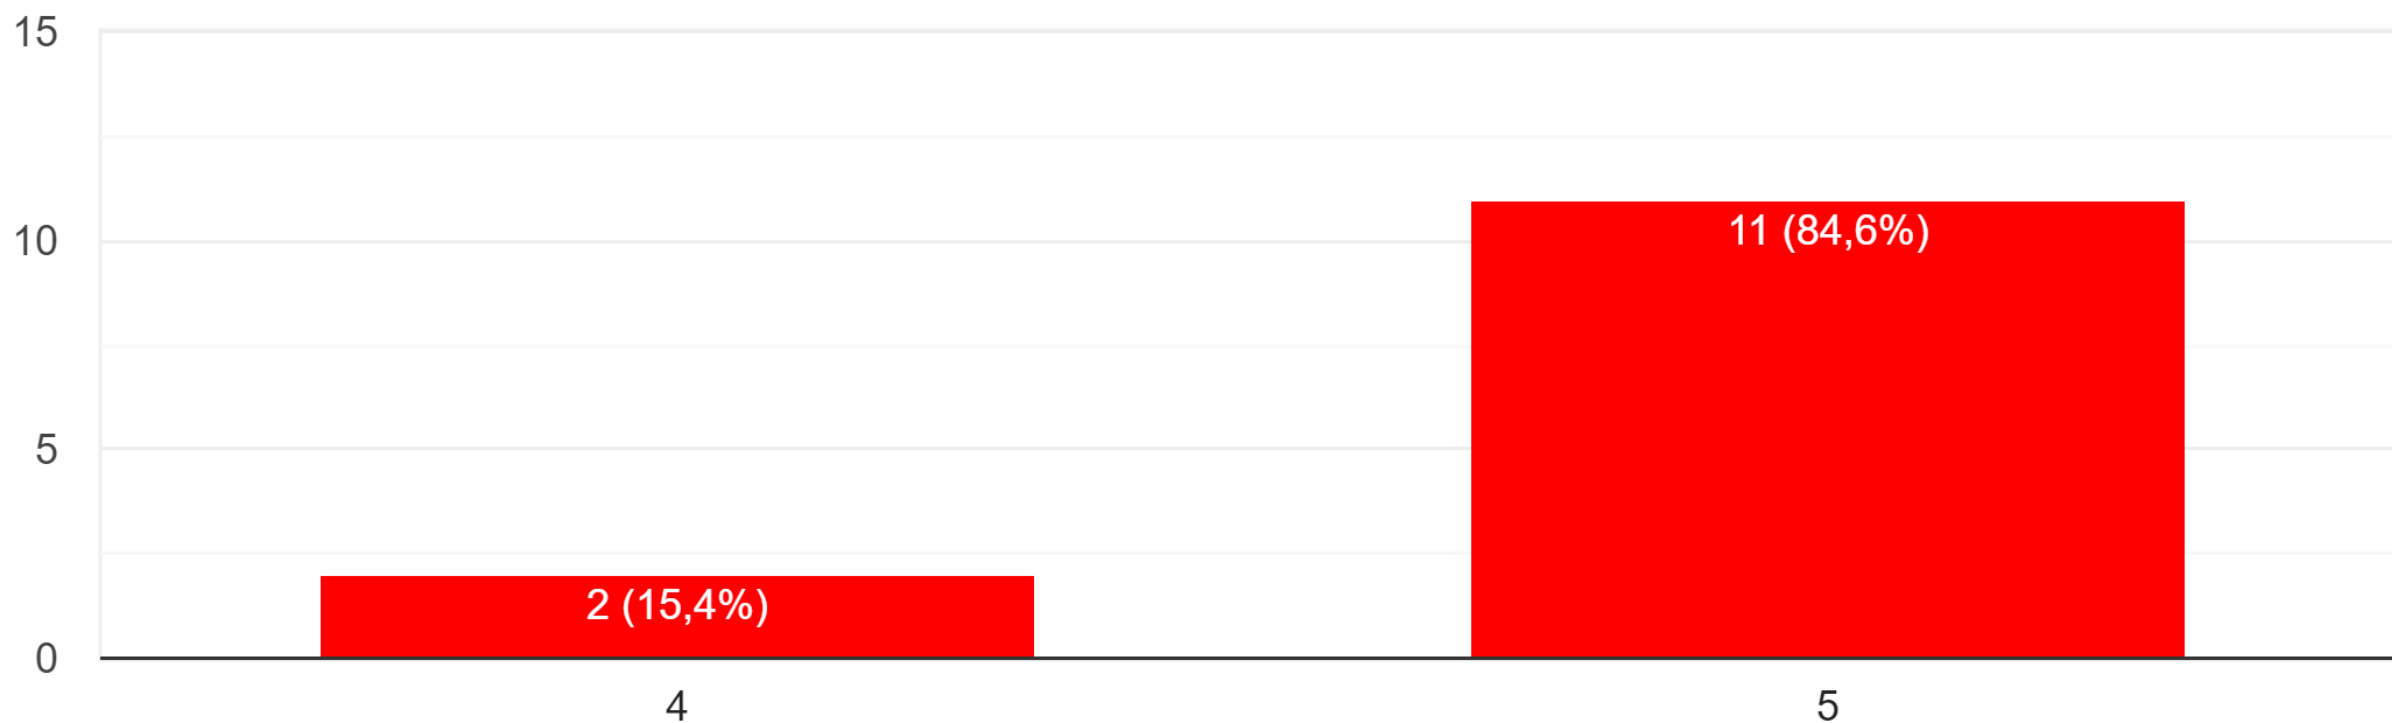

Did you have, during initial university education, a subject or subjects that directly contribute to the development of teacher competencies?

Did you attended previously a training or trainings that directly contribute to the improvement of teacher competencies?

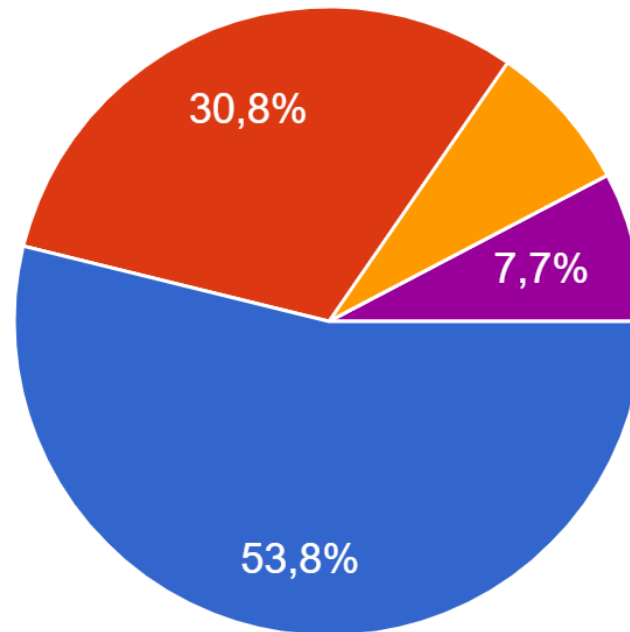

How do you rate the training? Enter a score from 1 to 5.

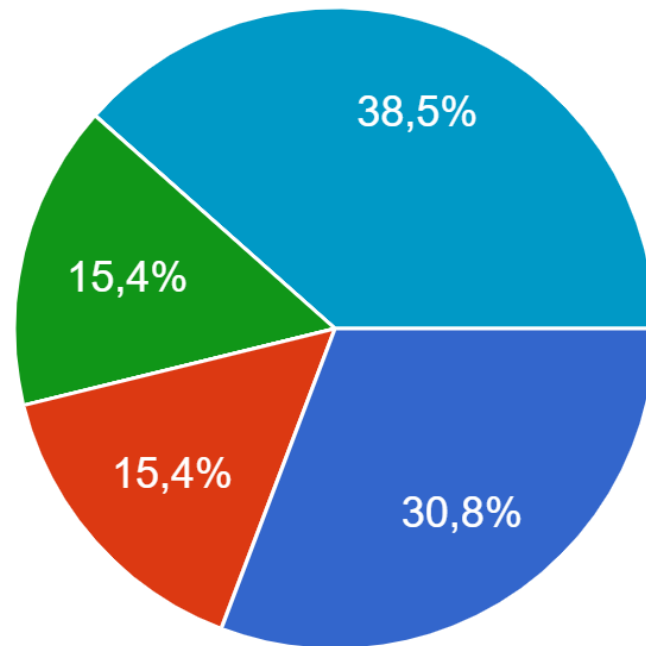

Average $\approx 4,85$

Which task was most interesting to you?

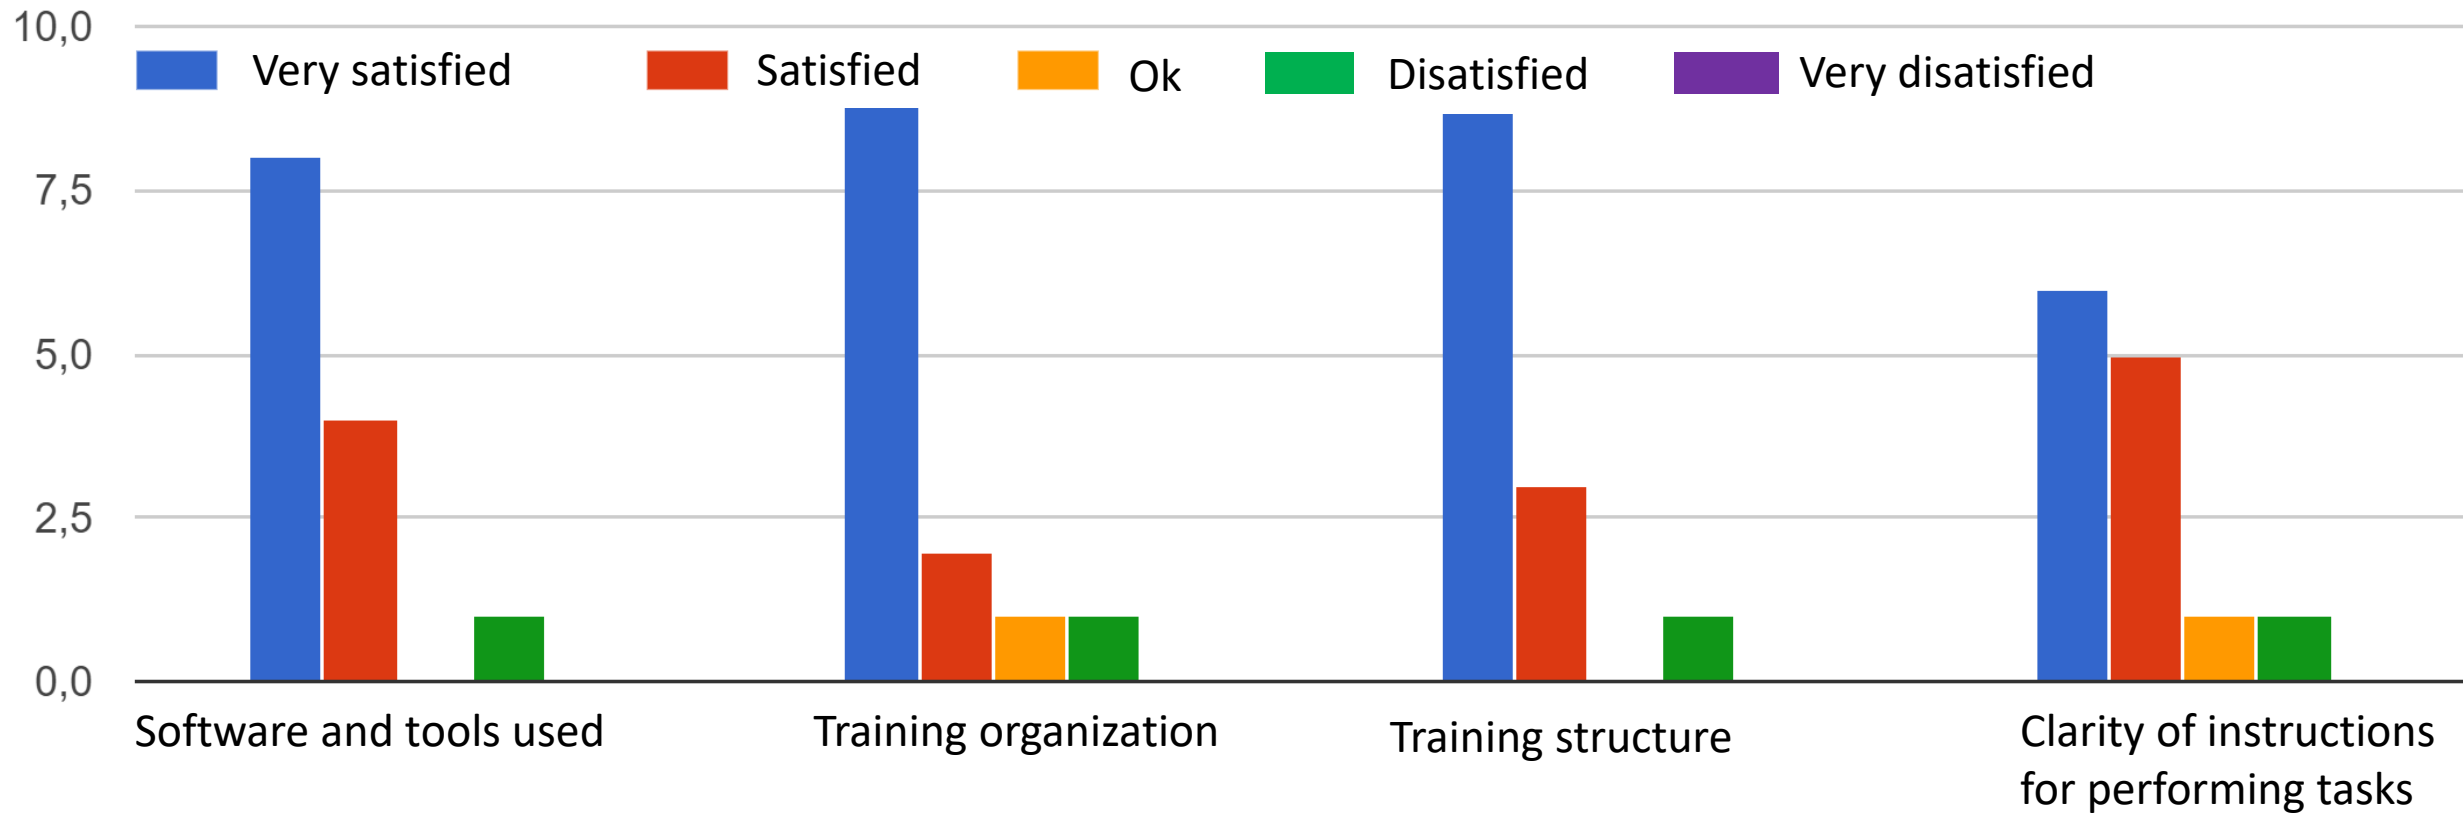

- I - Knowledge clips
- II - Interactive video
- III - Posters
- IV - Discussion and collaboration in HE
- V - Animations
- VI - Asking questions

Which task do you find most useful for your future work?

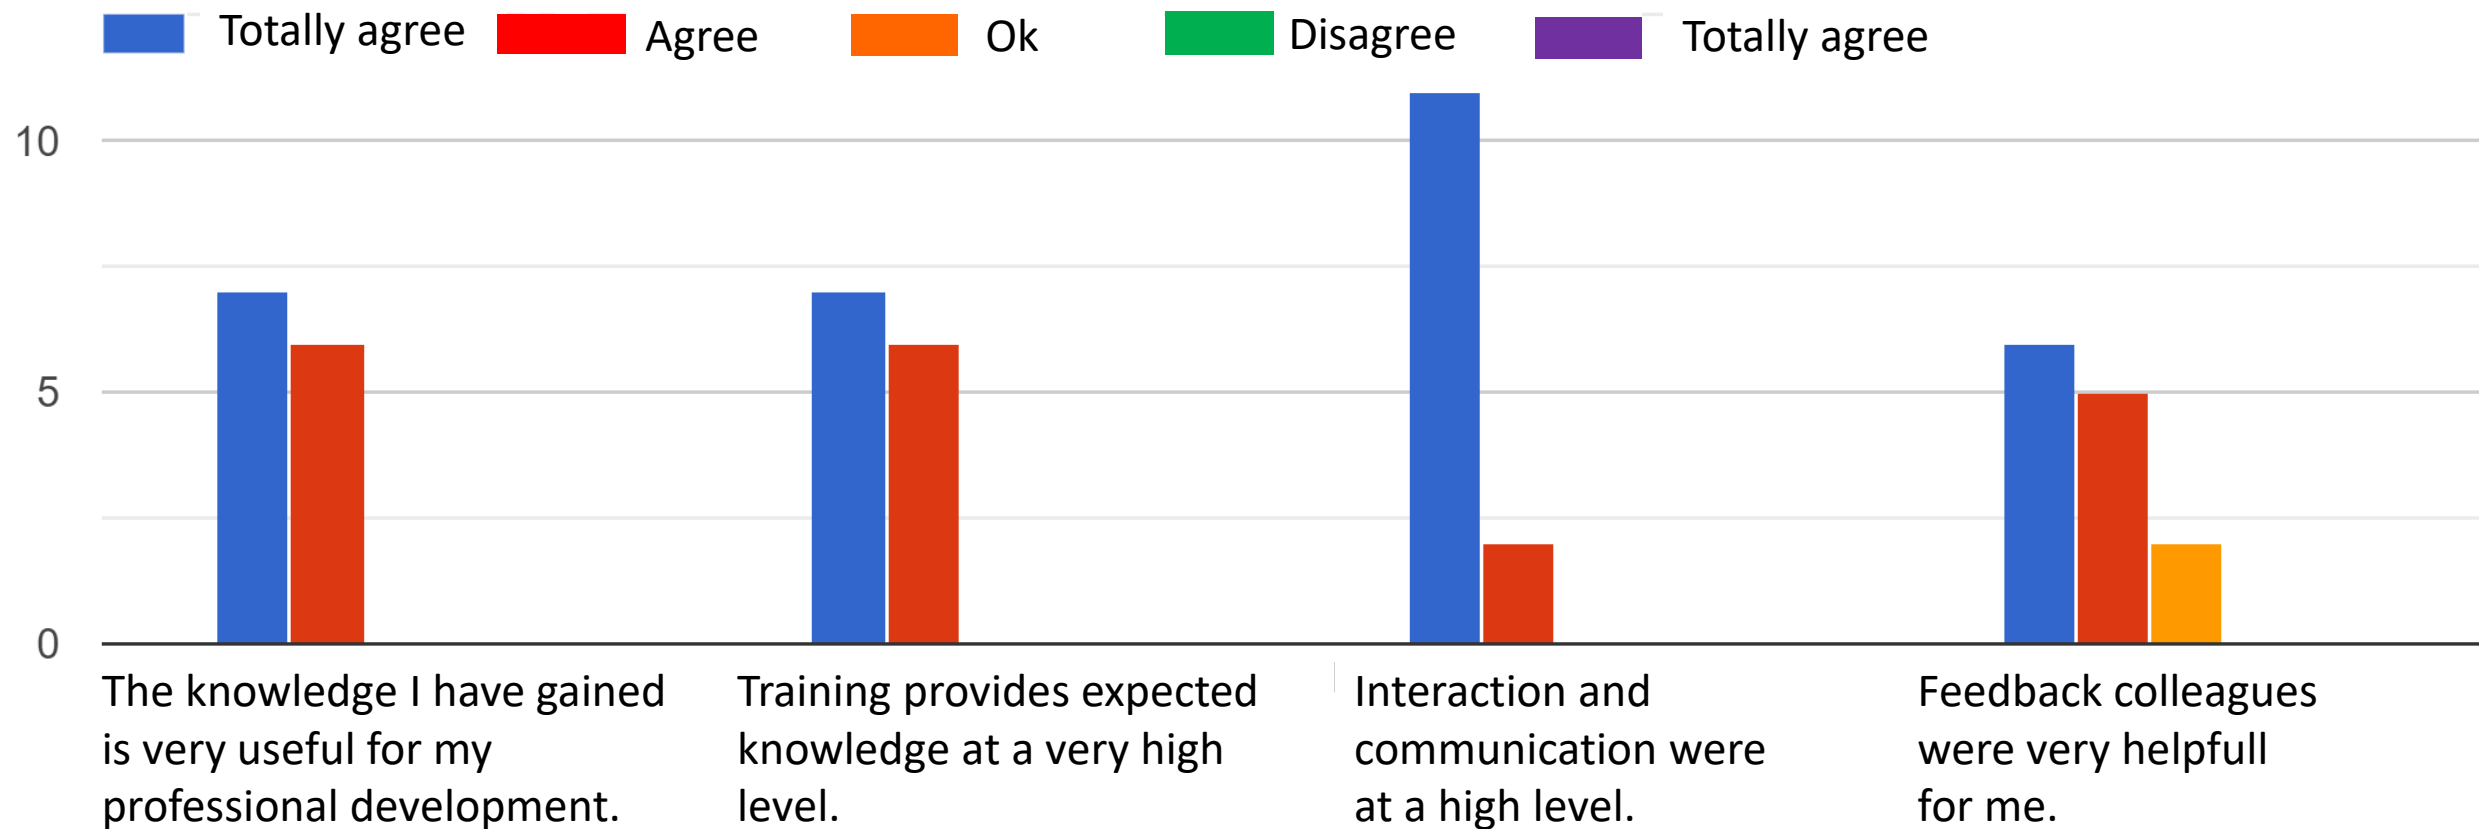

- I - Knowledge clips
- II - Interactive video
- III - Posters
- IV - Discussion and collaboration in HE
- V - Animations
- VI - Asking questions

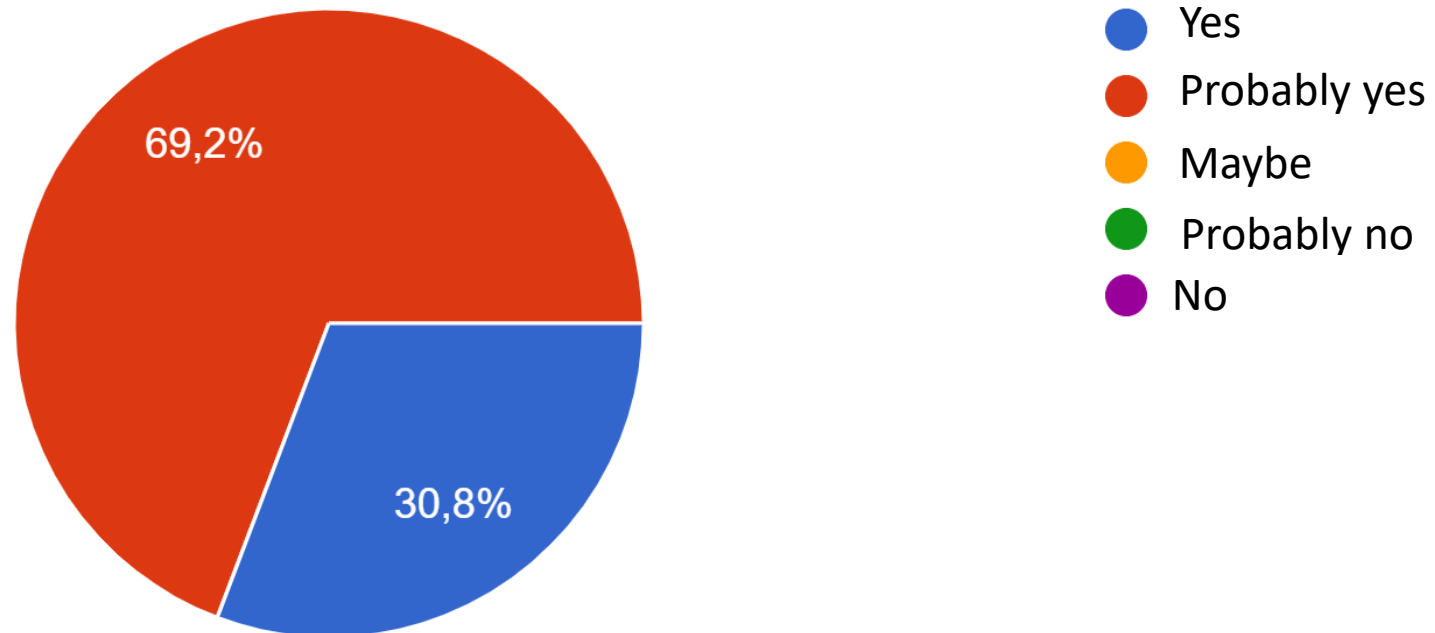

How do you rate the following aspects of training?

To what extent do they agree with the following statements?

Do you plan to participate in similar trainings in the future?

Please express your impressions from the training and suggestions for improvement in your own words.

I am very pleased to have had the opportunity to participate in a project activities like this. The impressions are phenomenal, the tasks were creative and purposeful. I will try to include as many learned things as possible in my future pedagogical work.

I will try to improve the knowledge I acquired during the training, so that I can apply them in further work. The training was very useful, working with colleagues was interesting. It would be more desirable if we had more time to process the topics as well as interpret the instructions given to us.

Please express your impressions from the training and suggestions for improvement in your own words.

I think that the training is extremely useful having in mind the current situation of teaching, because it provides an opportunity to immediately adopt the acquired knowledge and skills in the teaching process.

The training was very useful and I recommend it to anyone working in education.

The time spent in this training is a useful, I learned to work in many interesting softwares and applications and to apply new effective methods in teaching.

Although not everything can be applied in teaching at the faculty, my general impression is that the training was useful. It changed my viewing angle a bit and I start thinking how integrate some of the things I learned to my classes.

My expression about the training

As a team leader, I am very satisfied with the response of (primarily younger) colleagues and their commitment during training.

I think that the training was very useful and reach its goal. The participants mastered new teaching tools, but I think that it is even more important that it broadened the horizons of the participants, made them ask some very important questions for the future vocation of university teachers, and encouraged mutual communication and cooperation within teaching staff members.

Training evening consultations on each Tuesday will remain among the fondest memories of online communication and collaboration during CORONA pandemic times.
