

**Strengthening Teaching Competences  
in Higher Education  
in Natural and Mathematical Sciences**

Co-funded by the  
Erasmus+ Programme  
of the European Union

**SUBJECT: Report on the official visit**

During the workshop, from May, 17<sup>th</sup> to May 20<sup>th</sup>, 2019, the colleagues at the University of Banská Bystrica introduced to us the activities of their departments within the Faculty of Science and Mathematics, demonstrated contemporary teaching methods that apply both in classical teaching activities and in laboratories and computer classrooms. Examples of good practice in all areas of natural science and mathematics were presented, the content of their rich library, which represents an archive available to professors and students from all universities in Slovakia, and its database was introduced to us. The visit was also used for the meeting of representatives of partner institutions from Serbia and Albania, where we conducted outcomes of the surveys that had been examined at these institutions. We made the plan for preparing the draft report which would comprise a comparative analysis of the application of modern PPM methods and modern technologies at the universities in Serbia and Albania (based on analysis of the survey) and institutions from Spain, the Czech Republic and the Slovak Republic (based on the information obtained during the previous visits).
